ABOUT BUILDING SPECIFIERS CONFERENCE

The Building Specifiers conference is a series of conferences which highlight the role and importance of Building Specifications and all the subjects related to standards in a building, related to the material or its application. The 1st Edition of the building specifiers conference received an overwhelming response which enlightened the audience on the importance of building specification & standards. The 2nd edition of Building specifiers conference deliberated discussions on Building specifications with reference to High Rise Buildings and focusing on Aluminium, Glass, Facades & Coatings. The 3rd edition held in November 2017 focused on Interiors & Exteriors and covered a wide spectrum of subjects.

Now, after back to back outstandingly successful conferences in Sri Lanka for the past seven years, Futurex Conferences' (a division of The Futurex Group of Companies) Building Specifiers Conference plans to expand its foothold in the Democratic Republic of Nepal. Recovering from recent devastation and calamity, the construction industry of Nepal is exponentially booming and we believe that building specifications are the need of the hour. The upcoming conference to be held on the 6th of February will provide an open discussion platform to the architects, engineers, and the related industry professionals and educate them about the need and importance of specifications in a building and how to merge sustainable architecture and urban design in the lines of specifications.

PREFACE

Construction industry is one of the important sectors in any economy. Its contribution to the GDP and employment is very significant and plays important role in the development of infrastructure that is essential for the development of all other sectors. In Nepal, about 10 percent of the GDP is contributed by the construction sector and is one of the largest employers.

Like other industries, construction is continuously changing. The traditional view of construction is seriously out of date as the introduction of new processes, new technologies and new ways of working is turning the industry on its head. There are increasing challenges to reshaping our cities: they need to be smart and sustainable, but also liveable, affordable, welcoming, and resilient. This requires long-term integrated urban development strategies based on people's needs. When setting objectives and implementing strategies, cities and towns have to exercise leadership and put in place the capabilities to deliver. Private sector engagement can provide the investments necessary for this transformation. New regulations and standards can provide direction, provided these are fair and forward-looking with regard to the long timeframes and cycles inherent to urban planning and construction. It is essential that local governments invest in public transport and affordable housing.

It is important to keep on top of the latest challenges and potential solutions to ensure the industry's value chain can meet the demands of the future. The conference gives an opportunity to academicians, researchers and industrial players from various fields to discuss the recent advances and research results in the fields of Sustainable Architecture, Planning and Urban Design and all related areas such as engineering, education, interior architecture, social sciences etc.

Hence the conference is an invitation to architects, interior designers, engineers, policy makers and social partners to share knowledge from their fields of expertise according to the themes of the Conference which include, but are not limited to:

- Air Conditioning & Refrigeration
- Bathroom & Sanitation
- Case studies
- Climate change
- Cultural heritage and sustainability
- Decorative & Architectural lighting & Illumination
- Doors & Windows
- Economics and management
- Electrical, Wires & Cables
- Elevators & Escalators
- Energy efficiency
- Glass, Aluminium & Facade
- Green infrastructure development
- Hardware & Fittings
- Home & Office Automation
- International Cuisine & Kitchen Technologies
- International Furniture
- Paint, Coats & Wall Coverings
- Planning and built environment
- Plumbing, Pipes & Fittings
- Roofing & Cladding
- Safety, Security & Fire Protection
- Social sciences and sustainability
- Steel & Concrete
- Sustainability in education and training
- Sustainable architecture
- Sustainable landscape planning and design
- Sustainable materials and building technology
- Sustainable policies and governance
- Sustainable solutions in emerging countries
- Sustainable tourism and regional development
- Sustainable urbanism
- Switches & Switch Gears
- Tiles & Ceramics
- Transportation
- Waste water
- Water Technologies
- Wood, Veneers & Flooring

SPEAKERS

Opportunity to hear internationally renowned Architects and PMC Consultants

EMINENT ATTENDEES

- Architects
- Builders
- Bureaucrats
- Certification bodies
- Chief Engineers
- Construction Authorities
- Construction Companies & Authorities
- Consultants and Fabricators
- Contractors
- Government Departments
- Interior Decorators
- Policy Makers
- Project Management Consultancy
- Public Sector Undertaking
- Quantity Surveyors
- Town Ship Developers

WHY PARTICIPATE?

*Today knowledge is power,
it controls access to opportunities and
advancement;
this conclave brings in the knowledge
platform for you*

- Professionals from diverse fields from across the region will be invited
- Delegates from different related fields will attend the conference
- Impactful project presentations and case studies
- Informative technical sessions
- For the first time in Nepal the conference will feature the topic – Building specifier - the mantra for sustainable growth
- Dynamic discussions on a topical subject
- Paper presentations by industry experts
- Visionary international speakers sharing their wealth of knowledge
